Department of Labor (TrueIA - Prime)	Security Engineering Support
Department of Defense (TrueIA - Prime)	Security Engineering Support
Defense Information Systems Agency (IMRI – Prime)	Project Management & Security Engineering
IRS (Harris Development – Prime)	Information Security Engineer Support

Binary Consulting Group Inc. (BCG), founded in 2005 as QURIST Incorporated, began with a laser focus on tackling IT security challenges faced by government agencies. Driven by Rick Watson, President & Principal Consultant, the company built a reputation for delivering world-class cyber solutions. As client needs evolved, BCG saw an opportunity to bridge the critical gap between government governance and compliance mandates, and the complex technical infrastructure required to uphold them. This led to a strategic expansion in 2014, not just in service offerings and clientele, but also in identity – reborn as Binary Consulting Group Inc., a trusted partner for agencies navigating the intricate landscape of IT security, compliance, and governance.

And with that position we believe: **“The solution is BINARY.”**
